

ISRAELIS AND PALESTINIANS INJURED IN THE CURRENT VIOLENCE

**At least 11,671 Israelis and 86,974 Palestinians
have been injured since September 29, 2000.**

Hover over each bar for exact numbers.

“With no shooting from the Palestinian side, and often little or no use of tear gas to disperse the protests, Israeli soldiers have repeatedly fired live ammunition into unarmed crowds.”

- Shoot to Maim

Source: *Israeli injuries*: The [Israeli Ministry of Foreign Affairs](http://www.ifamericansknew.org/stat/injuries.html), last updated December 24, 2013. It is possible that the statistics from the MFA are not completely accurate. They may include non-Israelis injured in the conflict as well as Israelis who were injured in other places or by people who are not Palestinian.

Additionally, the Israeli Health Ministry reported that [2,354 Israelis](#) were injured during Israel's assault on the Gaza Strip last summer.

Palestinian Injuries: The [Palestine Red Crescent Society \(PRCS\)](#) reports that 28,372 Palestinians were injured between 2000 and 2004. The [United Nations Office for the Coordination of Humanitarian Affairs \(OCHA\)](#) has collected data on Palestinian injuries since at least 2005. However, as of 2013, their [Protection of Civilians: Casualties Database](#) has been unavailable online.

Instead, their figures for Palestinian injuries by Israeli forces for 2013 - 2015 are noted in weekly and monthly reports (see the latest [monthly report](#), published on January 5, 2016). The number of Palestinians injured by Israeli settlers is incomplete for the last two years, as UN OCHA records the [number of violent incidents](#) perpetrated by settlers rather than the exact number of people injured during these incidents.

See also their [report](#) on Israel's latest assault on Gaza, which injured [11,231](#) people.

Note: The OCHA database does not include injuries that occurred during Israel's "Cast Lead" assault on Gaza from December 27, 2008 to January 18, 2009, possibly because the organization did not have access to the Gaza Strip. However, in a [separate report](#) concerning the humanitarian situation in Gaza, OCHA reports that 5,380 Palestinians were injured during the offensive. Because the exact date of each of these injuries is unknown to us, they were added to our 2009 column, although a portion of these injuries actually occurred in the last four days of 2008. (See the list of all of [OCHA's reports on the Gaza Crisis](#).)

The exact number of Palestinians injured during the current uprising is very difficult to ascertain. This is caused in part by the chaos that ensued following the re-invasion of the West Bank during March and April 2002, the brutal attack on Gaza in the 2008-09 winter, and also by the fact that many Palestinian injuries go unreported and untreated (the PRCS numbers only include people who sought medical attention for their injuries). It is believed that more than **10,000** Palestinian children had already been injured in the first several years of this violence.

We have been unable to find details about the breakdown of injury types suffered by Israelis, so the chart below only applies to the Palestinians injured.

(If you know a reliable source for such information, please contact us. Thanks!)

	Palestinian Injuries Sep 30, 2000 - Dec 31, 2008
Percentage of those injured that are minors	West Bank: 35.7%; Gaza: 20% Palestine Monitor
Injured by Live Ammunition	8,889 PRCS
Injured by Rubber-/Plastic-Coated Bullets	7,253 PRCS
Injured by Tear Gas	6,824 PRCS
Injured by Misc. Causes	10,673 PRCS

Number of Permanent Disabilities	2,500+ Palestine Monitor
